# FRENCH'S SPECIAL LAWN GRASS

## HOW MUCH SEED?

## HOW TO CARE FOR IT

Mowing, watering, fertilizing, weed control and insect control are the routine requirements of a well-kept lawn. Three of these needs can be taken care of at one time by using one of the new three-way preparations in which fertilizer, weed killer and insecticide are skillfully combined. Ask us for details.

When possible, give your lawn a good top-dressing of organic matter at least once a year. Garden compost, peat moss, well-rotted leaves, sterilized cow manure, sheep guano are all good materials for top-dressing. Application should be made in early spring. Remember, a top-dressing of organic material does not remove the need for chemical fertilizers, but it will do for your turf what no chemical fertilizer can possibly do.

## WARNING

Do not use the unsterilized rotted manure which is being sold to inexperienced gardeners. It may be full of wild clover and other weed seeds and pests. It is expensive when you take into consideration that a few pounds of good fertilizer is equal to a sack of manure. If you want a moisture-holding material for top-dressing, use peat. We recommend the use of peat.

# NOVELTIES AND RECENT FLOWER INTRODUCTIONS

Most gardeners like to plant something different. We believe you can satisfy your desires with some of these outstanding novelties. Be "novelty-conscious" this year.

**ASTER, Heavenly Blue.** Extra-early type. Extreme earliness and good cutting stems make this a welcome type of Aster for the home gardener and florist. In full bloom before other Asters are in bud. Lacy Crego-type flowers, 4 to 6 inches across, are a pleasing shade of light lavender-blue. Pkt. 25c; large pkt. 75c.

**ASTER, Navy Blue.** Extra-early type. Here is a giant-flowered Aster that blooms about 14 weeks after planting. It is upright branching in habit and grows 24 inches tall. Flowers average nearly 6 inches and are held erect on strong, 16-inch stems. Color is a rich deep purple-blue. Pkt. 25c; large pkt. 75c.

**MARIGOLD, African, Kon Tiki.** Kon Tiki—the Sun God of the Incas—seems to perfectly describe this new pure yellow Marigold. It is an early-flowering dwarf African variety. Flowers average 3 inches and will bloom as early as the French types. Grows about 18 inches tall. Pkt. 25c; large pkt. 75c.

**SWEET PEA, Los Angeles.** Early flowering. In delicate corsage making, the soft coral-rose color tones of Sweet Peas blend beautifully. Los Angeles is deep coral-salmon-pink. Pkt. 25c; large pkt. 75c.

**SWEET PEA, Shasta.** Early flowering. Pure paper-white and extremely large flowered. Long, stiff stems carry four florets each. Pkt. 25c; large pkt. 75c.

**VERBENA, Elfin Types.** Dwarf and compact. Growth is upright, uniformly 9 inches tall. Trusses of florets measure over 2 inches across, and 15 to 20 stems comprise a single plant. Individual florets average over  $\frac{3}{4}$  inch. These attractive little plants are always a mass of flowers and never present a ragged appearance.

**Imp.** Bright rose with large white eye.

**Pixie.** Bright scarlet with cream eye.

**Sprite.** Colorful blend of pink and rose shades.

**Any of above, Pkt. 25c; large pkt. 75c**
